

FORMACIÓN

Sustainability News= The EU's New Deforestation Regulation (EUDR)

Why take this course?

Este curso ofrece una cobertura en profundidad de la Regulación de Deforestación de la UE (EUDR), brindándole las últimas actualizaciones e información para navegar los nuevos requisitos de cadenas de suministro sostenibles y el comercio de productos básicos con riesgo de deforestación. Adecuado para productos como ganado, madera, cacao, soja, aceite de palma, café, caucho y cualquier producto que los contenga.

15 min

English

Sustainability, ESG,
Environment and
Corporate Responsibility

e-Learning

Aprenderá sobre el alcance y definición de la regulación, su impacto en marcas, minoristas y cadenas de suministro globales, los requisitos de trazabilidad y la diligencia debida, los desafíos de implementación, las oportunidades de sostenibilidad para las empresas y las mejores prácticas para alinear las operaciones comerciales con políticas ambientales responsables. Este curso es esencial para cualquier organización que maneje productos básicos con riesgo de deforestación.

Qualification

Once the training programme has been successfully completed, the following qualification will be obtained:

- Sustainability News= The EU's New Deforestation Regulation (EUDR)
- This qualification will be issued by Bureau Veritas Business School.

Who is it for?

The course “Sustainability News= The EU's New Deforestation Regulation (EUDR)” is intended for:

- Supply chain and logistics professionals
- Business and sustainability leaders.
- Advisors and consultants.
- Academics and researchers.

What will you achieve through the course?

Once you have completed the training course, you will be able to:

- Understanding the New EU Deforestation Regulation – Learn the definition, scope, and key elements of this policy.
- Assessing Business Impact – Analyze how the regulation affects brands, retailers, and global supply chains.
- Navigating Compliance Requirements – Gain insights into traceability and due diligence expectations for businesses.
- Overcoming Implementation Challenges – Identify potential hurdles and strategies for effective regulation adoption.
- Exploring Sustainability Opportunities – Discover ways organizations can enhance sustainable sourcing and forest protection.
- Applying Best Practices – Develop actionable steps to align business operations with responsible environmental policies.

Why does Bureau Veritas recommend it?

Bureau Veritas recommends this course for organizations seeking to navigate the complexities of the new EU Deforestation Regulation. Understanding the regulation's definition, scope, and key elements is crucial for businesses to assess its impact on their operations, brands, and global supply chains. The course provides valuable insights into the traceability and due diligence requirements, equipping companies with the knowledge to ensure compliance and overcome potential implementation challenges.

By exploring sustainability opportunities and identifying best practices, this course empowers organizations to align their business operations with responsible environmental policies, contributing to the collective effort to protect forests and promote sustainable sourcing. Engaging with this comprehensive training can give companies a competitive edge in adapting to the evolving regulatory landscape and demonstrating their commitment to environmental stewardship.

Programme

1. Essential Guide to the E.U. Deforestation Regulations

This course provides in-depth coverage of the EU's Deforestation Regulation (EUDR), equipping you with the latest updates and insights to navigate the new requirements for sustainable supply chains and forest-risk commodity trade.

Suitable for commodities like cattle, wood, cocoa, soy, palm oil, coffee, rubber, and any products containing them.

2. Materials Matter - Navigating the Textile Industry's Newest Standard

This course will take us on a deep dive into Textile Exchange's new "Materials Matter" standard, a framework designed to revolutionize responsible material sourcing and environmental stewardship in the textile and apparel industry.

3. Extended Producer Responsibility (EPR) - From Policy to Implementation

This news update explores the latest developments in Extended Producer Responsibility (EPR) regulations, which shift the responsibility for product end-of-life management from consumers and governments to the manufacturers and brand owners, incentivizing more sustainable product design and waste handling practices across industries.
